Gemstone Color Chart at AJS Gems

Sun, 23 Jun 2019 09:42:00 GMT

Blue Gems. Though blue is a more common gem color than red, very few gems occur in a pure saturated blue. Sapphire is really the only example, though tanzanite sometimes comes close. Other blue gems tend to be a grayish-blue (spinel, benitoite), greenish-blue (blue zircon, apatite, tourmaline, gem silica) or a pastel blue (aquamarine, topaz).

Gems and jewels : uncut stones and objects d'art (Book ...

Gemstones That Change Color in Different Light

Sat, 13 Feb 2016 14:51:00 GMT

Like all color change gemstones, the larger the Zultanite, the more visible the color change. As if one phenomena wasn't enough, some Zultanite also possess the coveted cat's eye effect. Chatoyancy or the cat's eye effect is a reflection effect that appears as a single bright band of light across the surface of a gemstone.
